

# Economy forces change to maintenance strategies

SPRING 2009

## Are you **running to failure** more often these days?

If you are experiencing more and more unplanned equipment failure, and require resources and product to get the job done quickly, we can help.

### Where is your pain?

- Reduced staffing?
- Hard to find parts and components?
- Lack of technical expertise from your current suppliers?
- OEM replacement parts with long lead times and high costs?
- Breakdown sense of urgency lacking?

- Little or no process/machine enhancements offered?

Call J/E Bearing and Machine to find out how they can help take your pain away.

## J/E's strength is reacting to and helping with catastrophic failures!

J/E has built its business assisting customers with emergency breakdown maintenance requirements. You can count on us for:

- Industrial equipment repair
- Industrial machinery maintenance
- Difficult component part searches
- Proven technical skills and experience
- Demonstrated sense of urgency, 24 and 7, to resolve break down situations
- Pickup and delivery available

## J/E Bearing helps companies whose internal resources limit ability to react

### Repair Rebuild Retrofit

Whether it is an emergency repair, a complete rebuild, or a complete retrofit, J/E's integrated facility offers one stop service for all your equipment needs.

- J/E has over 25 years experience in maintenance and related services
- J/E are specialists in emergency breakdown repair
- J/E has all the necessary equipment, practical/technical product knowledge and understanding backed by 25 Years of experience.
